

From The Head, Chemistry

CHEMCOS, our Chemical Society e-magazine has taken a new avatar after a few years break. The department is really thankful to all the editorial team members and contributors for providing a facelift to this online edition. We are very happy to know that the first edition of the e-magazine is ready and will be released online shortly. The magazine is carrying articles in both English and Hindi. We are told that future issues will attract news/articles from alumni including staff and faculty. The current issue features an interesting and thought provoking interview by Professor HC Peter Göllitz, the Editor-in-chief of one of the leading Chemistry journals, *Angewandte Chemie*. A couple of students have penned a few poems reflecting their thoughts as a student at IITD. Many others have contributed recent chemistry related news. A brief report from the MSc and MTech batches punctuated with memorable photographs add further colour to this opening issue. We sincerely wish the online magazine a great success.
